Full profile and project details

ALEESHYA KRISHNA MV

FULL STACK DEVELOPER · MERN & NEXT.JS

2.5+ years building React, Next.js and Node.js applications	**6+ live projects** incl. 2 for Dubai businesses: tourism and pet services	**Immediate** in Dubai, ready to join

PROFILE

Full stack developer with 2.5+ years of experience building and maintaining live web applications with React, Next.js, Node.js and TypeScript. I have delivered booking and marketplace features for two Dubai businesses, built invoicing for a multi-tenant B2B SaaS, and launched my own AI booking platform with automated tests and CI.

WORK EXPERIENCE

Web Developer
Apr 2025 – Aug 2026

Limenzy Technologies Pvt Ltd | Calicut, India · projects for Dubai clients

- **Zerzura Experiences (Dubai):** built the booking flow in Next.js (Bokun API over GraphQL for live listings, availability and checkout) and led the technical SEO: SSR/SSG, 301 redirects, JSON-LD. **zerzuraexperiences.com**
- **PetBae (Dubai):** built the pet-grooming booking flow and secure sign-in (OTP, Google/Facebook login, role-based access) in React on the backend team's PHP APIs, and integrated Stripe payments. **petbae.com**
- **TalentOn 2.0 (multi-tenant B2B SaaS):** built the invoice module (manual, automatic and multi-currency invoices, approval workflow, PDF invoices with Puppeteer) and reporting dashboards in React and Node.js.
- Improved page speed with SSR/SSG and Redis caching; handled production support tickets in ServiceNow.

Full Stack Developer
Jan 2024 – Mar 2025

Mentoons | Bengaluru, India

- Led the React.js redesign of the company website, improving responsiveness and Lighthouse scores. **mentoons.com**
- Built MERN features and REST APIs, including real-time chat and video calling with Socket.IO; optimised MongoDB queries.
- Integrated Stripe, Google OAuth, AWS S3 and Twilio OTP; deployed on AWS EC2 and managed access with IAM.

Full Stack Developer Trainee (full-time)
Sep 2022 – Dec 2023

Packapeer Academy | Kochi, India

- Built full MERN applications with Razorpay payments, Cloudinary media uploads and email/password authentication.
- Deployed them on AWS and DigitalOcean with an Nginx reverse proxy, PM2, SSL certificates, firewall rules and DNS on AWS Route 53.

OWN PROJECT

ProServe – AI Service Booking Platform
Mar 2026 – Present

pro-serve-client.vercel.app | github.com/aleeshyakrishna

- Built and launched on my own: a UAE home-services booking platform (Next.js, TypeScript, Node.js, PostgreSQL / Supabase) with customer, provider and admin roles and an English / Arabic (RTL) interface.
- AI booking assistant using Google Gemini function calling: customers describe what they need in plain English, and it searches services and checks availability, with a rule-based fallback.
- Secured with Row-Level Security on every table and covered by Jest + Supertest API tests, Vitest unit tests and Playwright end-to-end tests, all run by GitHub Actions on every pull request.
